LAB PFSENSE :

Modification du serveur DNS :

on fait : nano /etc/bind/named.conf.options

```
options {
        directory "/var/cache/bind";

        // If there is a firewall between you and nameservers you want
        // to talk to, you may need to fix the firewall to allow multiple
        // ports to talk.  See http://www.kb.cert.org/vuls/id/800113

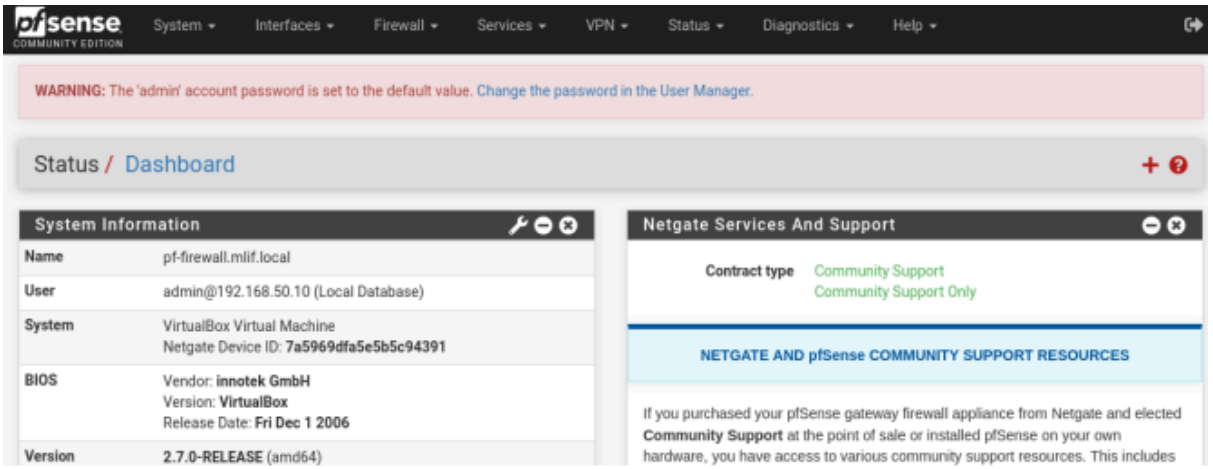
        // If your ISP provided one or more IP addresses for stable
        // nameservers, you probably want to use them as forwarders.
        // Uncomment the following block, and insert the addresses replacing
        // the all-0's placeholder.

         forwarders {
                172.16.10.20;
                172.16.20.21;
        };

        allow-query {192.168.0.0/16; 172.16.10.0/24; localnets;};
        //========================================================================
        // If BIND logs error messages about the root key being expired,
        // you will need to update your keys.  See https://www.isc.org/bind-keys
        //========================================================================
        dnssec-validation no;

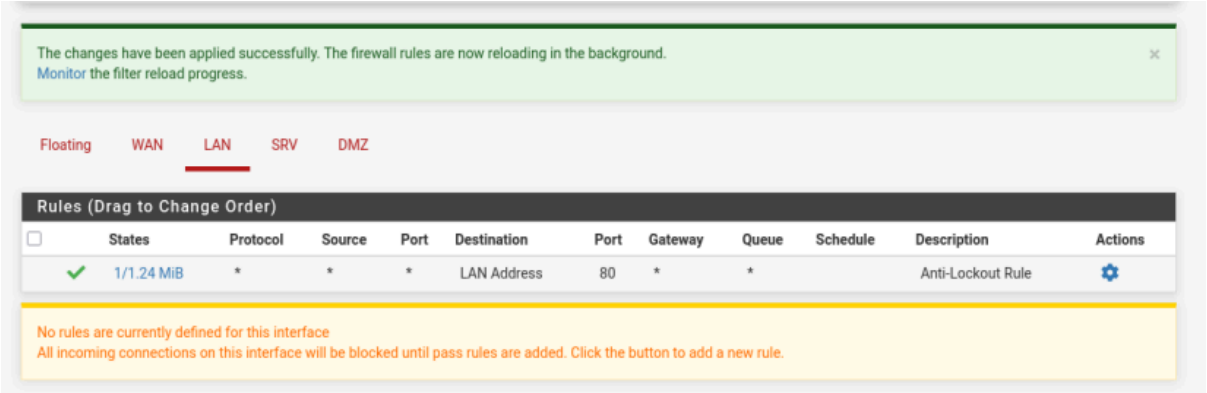
        auth-nxdomain no;    # conform to RFC1035
        listen-on-v6 { any; };
};
```

Connexion au parefeu depuis la machine cliente :

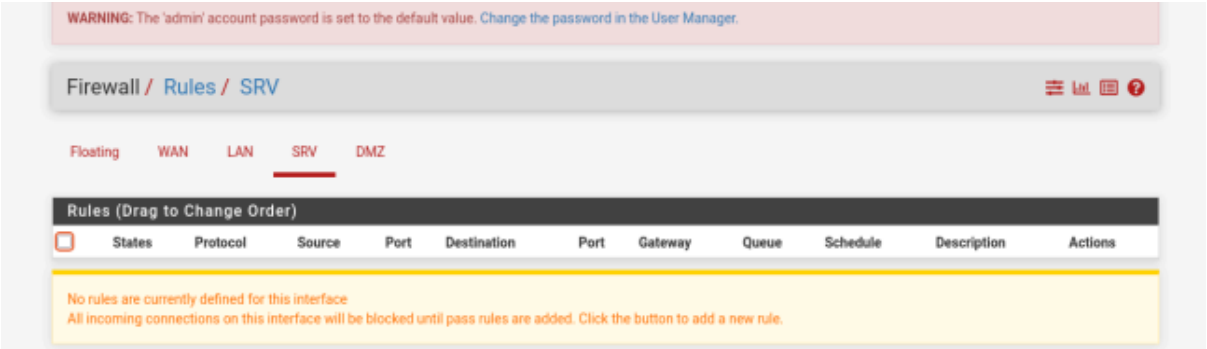


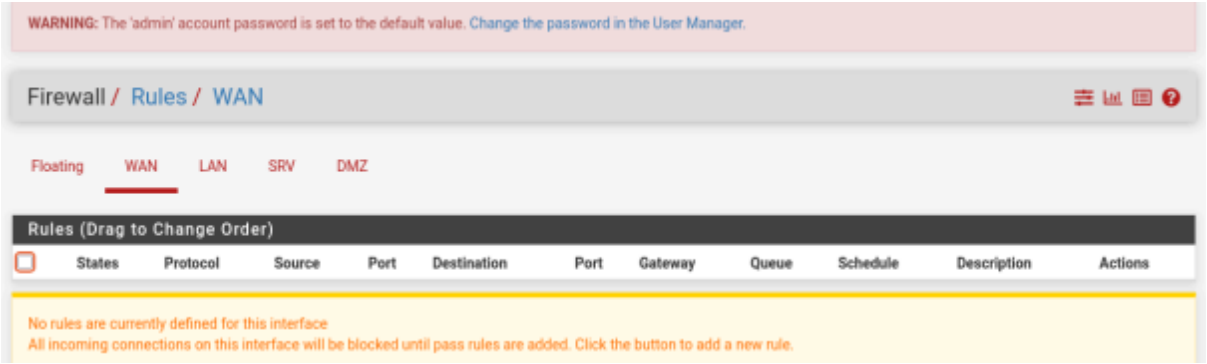
AHOUARI
IDRISS

Suppression des rèlges DMZ :

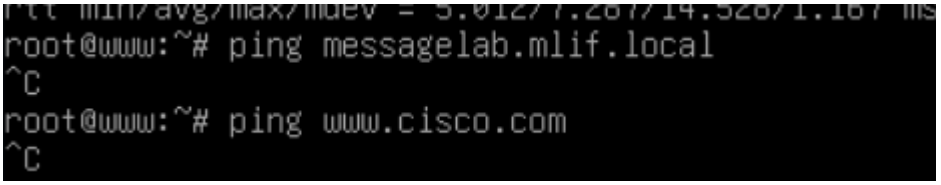


Pareils pour SRV et CLIENTS :





Logiquement , les pings depuis la DMZ échoue :



AHOUARI
IDRISS

Création des allias pour ensuite se faciliter la taches lors de la création de regles ect :

Firewall Aliases IP

Name	Values	Description	Actions
DEBIAN_TRAINING_DMZ	192.168.200.5		
DEBIAN_TRAINING_SERVEUR	192.168.100.10		
IPS_DNS_LYCEE	IP_DNS_LYCEE_1, IP_DNS_LYCEE_2		
IP_BLACKLIST_CLIENTS	192.168.50.20		
IP_DNS_LYCEE_1	172.16.10.20		
IP_DNS_LYCEE_2	172.16.10.21		
SRV_DNS	192.168.100.10		
SRV_FTP	192.168.100.10		
SRV_MAIL	192.168.100.10		

On peux également creer des allias de ports :

Firewall Aliases Ports

Name	Values	Description	Actions
PORT_DNS	53		
PORT_IMAP	143		
PORT_MAIL	PORT_IMAP, PORT_SMTP		
PORT_SMTP	25		
PORT_WEB	80, 443		

Add

Création des règles de filtrages :
