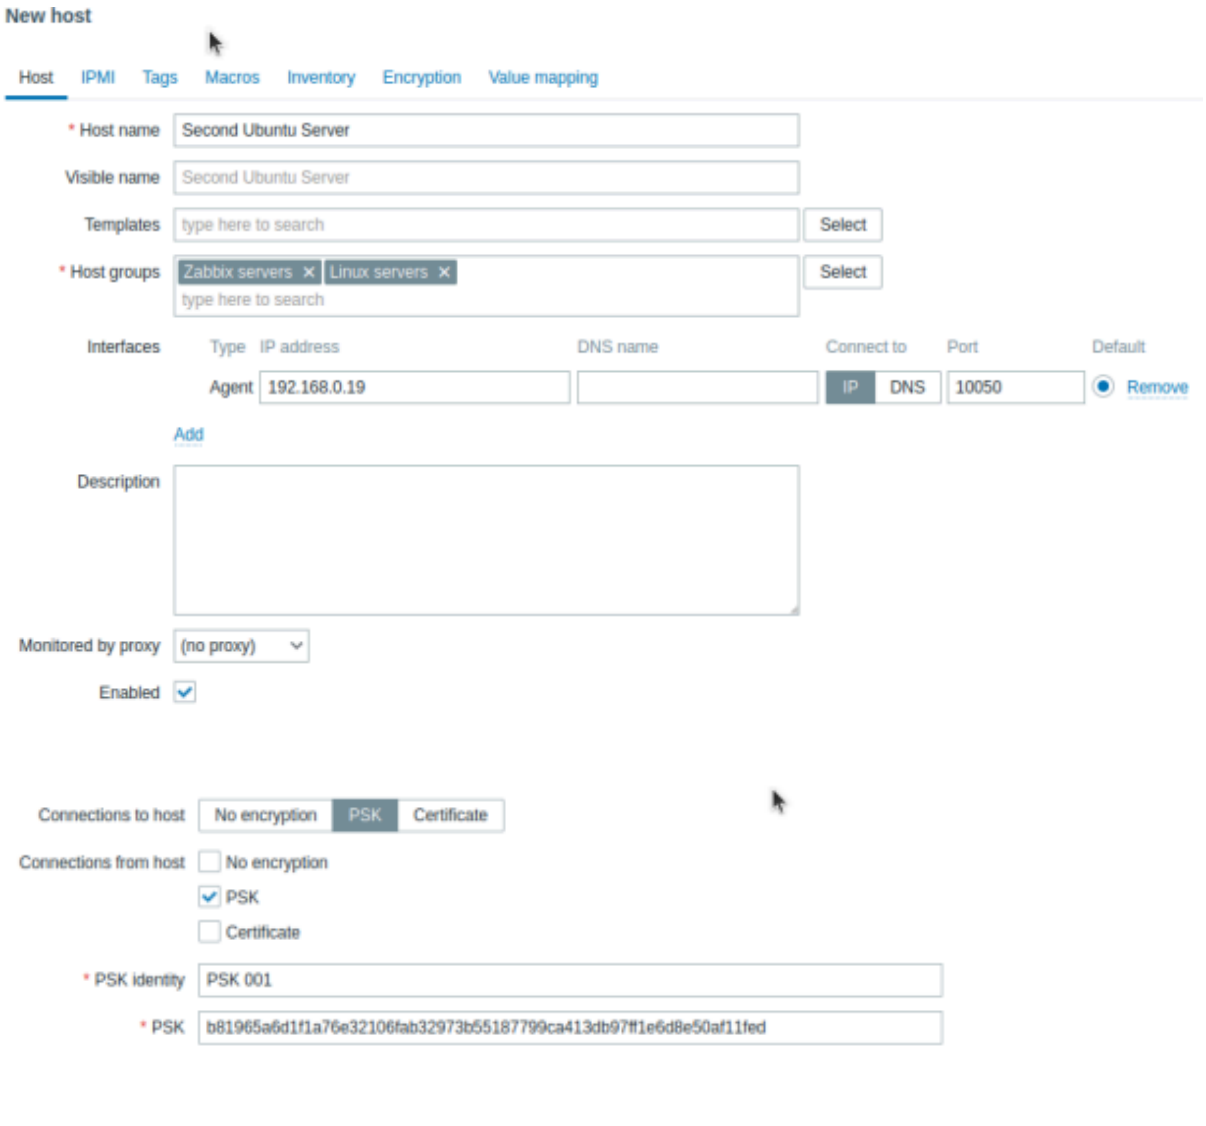
ZABBIX :

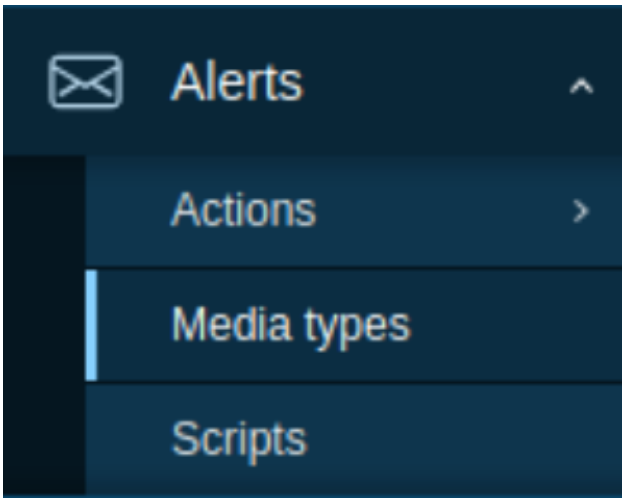
On se connecte a notre base de donnée :

Voici l'interface

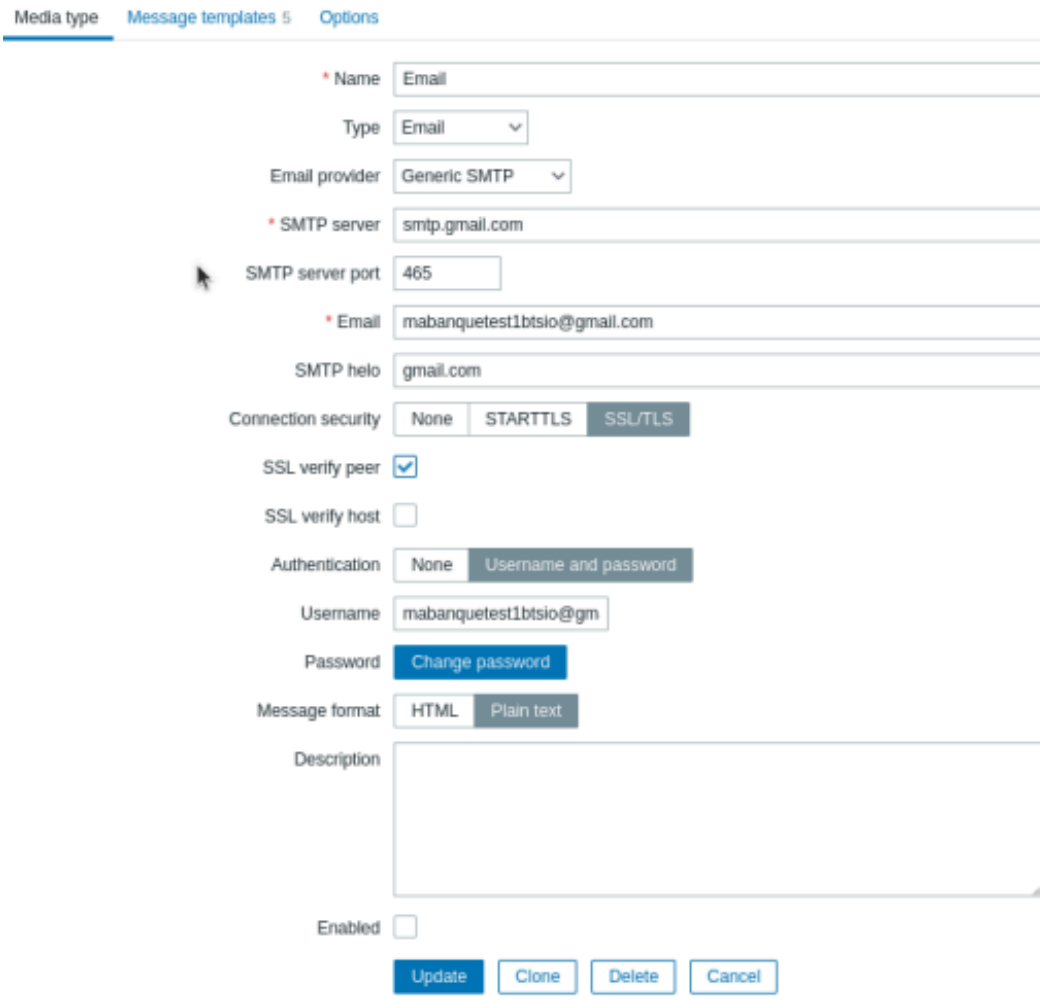
Création d'un hôte :



Les alertes sont repertoriés ici :



On rentre le mail sur lequel on veux recevoir les alertes et on paramètre nos altertes



Ensuite on crée un utilisateur :

User Media Permissions

* Username: moi
Name:
Last name:
Groups: type here to search — Select
* Password: ••••••••••
* Password (once again): ••••••••••
Password is not mandatory for non internal authentication type.
Language: System default
Time zone: System default: (UTC+02:00) Europe/Paris
Theme: System default
Auto-login
Auto-logout: 15m
* Refresh: 30s
* Rows per page: 50
URL (after login):
Add Cancel

On lui met le role admin

User Media Permissions

* Role: Admin role — Select
User type: Admin
Permissions

Group	Type	Permissions
All groups	Hosts	None
All groups	Templates	None

Permissions can be assigned for user groups only.

Access to UI elements

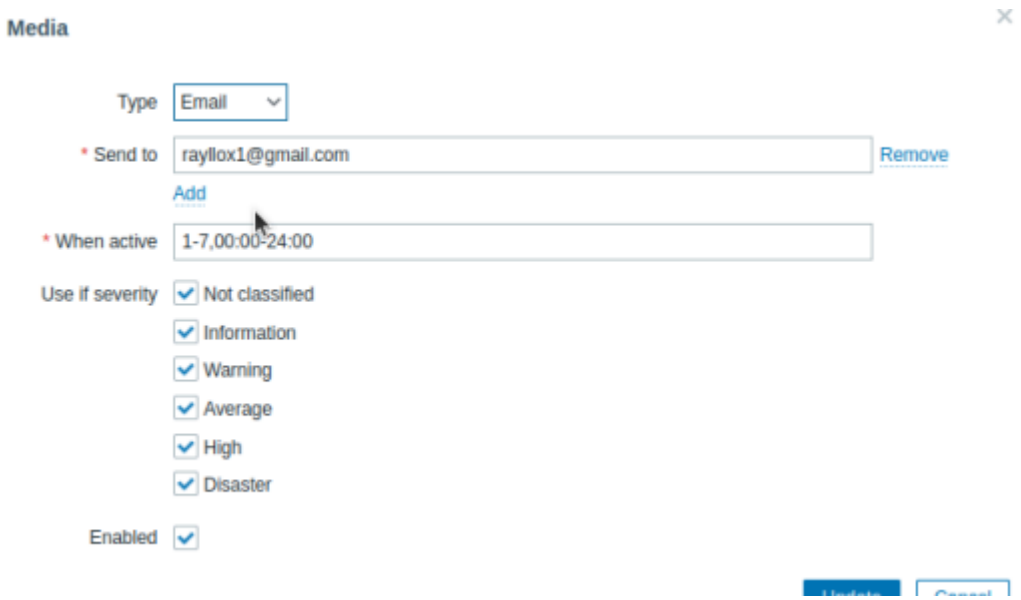
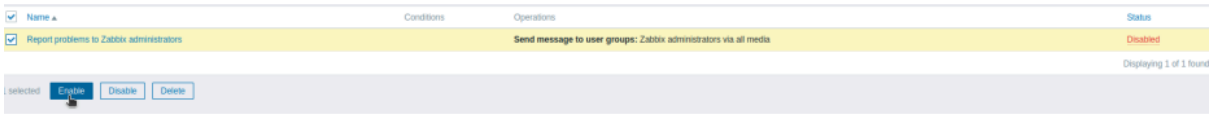
Access to services



On fait en sorte que les admin reçoivent les alertes :



L'admin reçoit maintenant les alertes pour la supervision avec zabbix
